AUTOMOTIVE CHARACTERISTICS

CHEMICAL & STAIN RESISTANT - Our automotive flooring solutions are resistant to stains from oil, chemicals, and other substances commonly found in automotive environments. Along with this, the seamless and impervious nature of our floors prevents the accumulation of dirt, debris, and harmful substances, facilitating straightforward cleaning and maintenance routines.

ENHANCED SAFETY - Safety is paramount in any workplace, and automotive repair facilities are no exception. Our floors come equipped with anti-slip properties, significantly reducing the risk of accidents and injuries. Additionally, striping lines can be added to your floor which reduce the risk of collisions, ensure orderly parking, and provide clear pathways, contributing to a safer environment. Along with this, the reflective quality of these flooring systems can improve lighting efficiency, creating a brighter workspace that aids in meticulous automotive work.

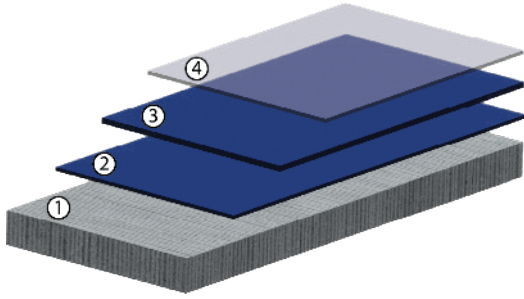

AESTHETIC & FUNCTIONAL FLEXIBILITY - Beyond their functional benefits, epoxy and urethane cement floors offer a range of aesthetic options to enhance the professional appearance of automotive facilities. Available in various colors and finishes, these flooring solutions can be tailored to align with branding to create a visually appealing environment that reflects the quality of workmanship offered by the facility. The option to incorporate logos or demarcation lines further enhances the workspace's functionality and aesthetics.

ENHANCED VISIBILITY - The uniform color of our solid colored floors create a clear and consistent background, helping to highlight any spills, leaks, or dropped items quickly which is vital in any automotive environment.

OUR SOLUTIONS

Thin Mil- CT-3EEU

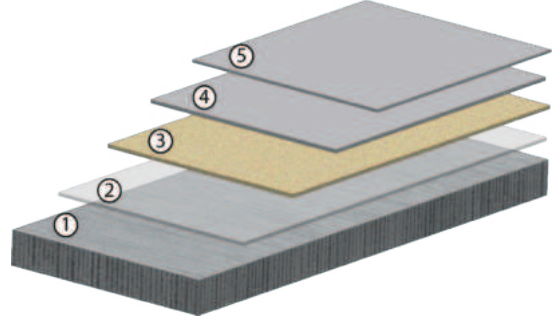

1. Prepared Concrete
2. 100% Solids Epoxy
3. 100% Solids Epoxy
4. High Performance Urethane

Impact Resistance

Broadcast - BC-4EAPU

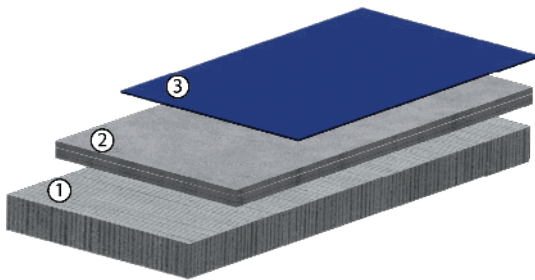

1. Prepared Concrete
