

Concrete Surface Prep

Better Bond = Better Floor

Bond approach refers to the crucial task of securely adhering a flooring system to a concrete substrate. A poor bond between the flooring system and the concrete substrate can lead to failure.

Therefore, meticulous concrete preparation is of utmost importance when installing a new floor system. At Brilliant Epoxy Floors, we prioritize the longevity of your floor by employing state-of-the-art diamond grinding machinery and relying on our proficient in-house team of highly skilled technicians.

With our expertise and equipment, we guarantee a durable and long-lasting flooring solution.

MINIMAL PROFILE

AGGRESSIVE PROFILE

The success of any polymer flooring system is contingent upon a strong bond with the concrete substrate, regardless of its type.
